RYSE ENERGY LLC - AIR Loyalty Program

Ryse Energy LLC thanks our AIR customers, 25+years and going strong!

2-Year Warranty on PWP repaired turbines under Loyalty Program
(No repairs/parts on 303/403 AIR turbines)

$884 - Upgrade price for AIR X Marine/AIR Breeze Customer (Carbon Fiber Complete Upgrade kit).

The turbine must be in relatively good condition and not fully corroded. If sent to us unfixable, we will offer the new turbine price. Upgrade includes Circuit Kit, Nose Cone, CF (upgraded carbon fiber/silent blade set), Bearing Kits (Face and Yaw), Rework or Replace Slip Ring Assembly and Labor. Shipping not included in price.

$615 - AIR Breeze/AIR 40/AIR 30/AIR X/AIR X Marine (Black Blade Complete Upgrade kit).

The turbine must be in relatively good condition and not fully corroded. If sent to us unfixable, we will offer the new turbine price. Upgrade includes Circuit Kit, Nose Cone, Black Blades (standard production blades), Bearing Kits (Face and Yaw), Rework or Replace Slip Ring Assembly, Labor. Shipping not included in price.

$406 - All Turbines (Power and Control Electronics Upgrade Kit) - 1 year warranty on Power Electronics Upgrade

The turbine must be in relatively good condition and not fully corroded. If sent to us unfixable, we will offer the new turbine price. Upgrade includes Circuit Kit, clean, service and rework slip ring assembly, full turbine inspection/clean-up and Labor. Shipping not included in price.

$153 – Upgrade price for Circuit Control Pic chip to new Lithium-Ion Control Update

**Pricing does not include return shipping

This upgrade is available for turbines of manufacture date April 13th, 2018, to Nov 2020. If older turbines, please refer to Power Electronics Upgrade ($406). All turbines of manufacture date of Nov 2020 or newer have the newest technology.

Turbine will be upgraded to the latest control algorithm by replacing the Pic chip on the control electronic circuit board. This will provide the latest control upgrade available and is especially critical if you have a Lithium-Ion battery bank. The full circuit will not be replaced. Upgrade includes full turbine inspection and cleaning (slip ring, brushes and nacelle) and retest after installation of Pic chip. Shipping not included in price.

(Prior to Shipment) Turbines will require, by customer, partial disassembly to ascertain ability to fix/upgrade. We will require pics and a conversation with Tech Support. This is critical to determine if the turbine can be repaired or upgraded. If corrosion is present in turbine, Primus must be made aware to determine eligibility of repair. There may be a $65 inspection/disassembly fee to determine if turbine is repairable under Loyalty Program. The $65 fee will be waived if turbine is determine to be repairable or new turbine is purchased.

Upgrade to a New Turbine:

3-Year Warranty on Ryse Energy LLC new from factory turbines

Discounted Pricing (with trade-in of old turbine-customer responsible for shipping to Houston, TX/ factory service center)

Turbine	AIR 30/40	AIR Breeze / AIR X Marine	AIR Silent X	AIR MaX
